RESTAURANTHUB ASSET LIST FOR INSURANCE PURPOSES.

- The design of this list was inspired once after we had serious water damage in a restaurant. I had to fill in the report for the insurance claim. I had to find the make, model, and serial numbers of all the damaged assets.
- To compile the list accurately with detail of the purchase dates and the prices that we paid took me day's to compile.
- There is a column included accounting for yearly depreciation of the assets followed by a column for the new value.
- Your insurer can advise on how you should insure your assets and at which value.
- Lastly, the final column is for video or photographic proof that the asset exists.
- If you struggle for time, like most of us, RESTAURANTHUB Management Consultants are available to complete the audits on your behalf at a nominal rate.
- Please contact Marius Joubert on 0605254998 or marius@restauranthub.co
